

IMAGELINKS

DOCUMENT MANAGEMENT SOLUTION

ImageLinks™ | Document Management Solution: ImageLinks, is a bilingual (Arabic/ English) system that streamlines the processes of scanning, capturing, indexing, organizing, storing and retrieving documents. Supported with Image Links Web client, it enables the organization to access and share and retrieves the information throughout the enterprise using the Internet technologie

■ DETAILS:

- ImageLinks is a fully bilingual (Arabic/English) web Document Management System.
- A state-of-the-art client-server system that allows you to scan, capture, index, organize, store, and retrieve documents easily through a GUI interface.
- Open architecture makes implementation easy and affordable, and the modular design and scalability allow ImageLinks to grow based on your network and imaging needs.
- The system is appropriate for a variety of sectors, including Finance, Government, Healthcare, Telecommunications, and Education.
- ImageLinks is a database-independent (SQL/Oracle) system, and has already been implemented in hundreds of sites across the MENA region.

■ BENEFITS

- Central document pool for all documents
- Global Access via web
- Complete search results in seconds
- Documents' collaboration and routing
- Reduced storage space
- Protection against fire and damage

■ MAIN MODULES
